- Not all students included in SRI student reports are included on the certified enrollment count for funding through the school aid foundation formula.
- NOTE: The weighted count for special education students is the last Friday in October and reported through a different data collection. Not all students included on the special education count are included on the certified enrollment count.

APPENDIX I:
GLOSSARY

Resident Student: a child who is physically present in the district, whose residence has not been established in another district by law, or lives in a juvenile detention center, foster care facility, or residential facility in the district (IAC 282.1). No student can be a resident of more than one school district at the same time, and no student can be reported as more than 1.0 FTE.

Competent Private Instruction (CPI): Private instruction provided on a daily basis for at least 148 days during a school year, to be met by attendance for at least 37 days each school quarter, by or under the supervision of a licensed practitioner in the manner provided under IAC 299A.2 (licensed practitioner) or other person under IAC 299A.3 (nonlicensed person – parent, guardian, or legal custodian), which results in the student making adequate progress (IAC 299A.1).

Full-Time Equivalent (FTE): The number of periods of expected attendance of a student divided by the total possible number of periods of attendance for the year. For example, the FTE for a half-day, full-year kindergarten student would be calculated as follows:

(4 periods * 180 days) / (8 periods * 180 days) = 0.50

Home School Assistance Program (HSAP): Program which provides instruction or instructional supervision offered through a public school district by a teacher, who is employed by the public school district, who assists and supervises a parent, guardian, or legal custodian in providing instruction to a child. A home school assistance program is only available for students whose instruction is not otherwise supervised by a licensed teacher.

Jr Sr Rule: Resident regular education students who are in grades eleven or twelve who are attending the district in which they were resident students on the last day of the school year preceding their eleventh or twelfth grade school year under the junior-senior rule. Those students are not open enrolled and no tuition should be billed. Those students will be treated and counted as if they were resident students of the district that they were attending. However, if the students were already open enrolled prior to completing tenth or eleventh grade, then those students continue as open enrolled students. The junior-senior rule only applies to those that were not already open enrolled students at the time that they qualified for the jr-sr rule.

IPI: Means instruction that meets the following criteria: a) Is not accredited; b) Enrolls not more than four unrelated students; c) Does not charge tuition, fees, or other remuneration for instruction; d) Provides private or religious-based instruction as its primary purpose; e) Provides enrolled students with instruction in mathematics, reading and language arts, science, and social studies; f) Provides, upon written request from the superintendent of the school district in which the independent private instruction is provided, or from the director of the department of education, a report identifying the primary instructor, location, name of the authority responsible for the independent private instruction, and the names of the students enrolled; g) Is not a nonpublic school and does not provide competent private instruction as defined in 299A.1(2); h) Is exempt from all state statutes and administrative rules applicable to a school, a school board, or a school district, except as otherwise provided in chapter 299 (IAC 299A.1 (2b)

APPENDIX II:
FTE GUIDE

NONPUBLIC SHARED TIME STUDENTS – DISTRICT OFFERED CLASSES

The following guides are used for shared time nonpublic students (Entry Code = '8' Nonpublic Shared Time), regardless of their districts of residence, who are enrolled in public school classes, in which public school students are also enrolled, or are provided public school services in the public schools of your district that are not available to them in the accredited non-public schools they attend. The nonpublic MUST be located in your district (256.12(1)).

These guides do NOT apply to students who…

a. *Attend non-accredited nonpublic schools*
b. *Attend classes or receive services only at the nonpublic school location*
c. *Are under competent private instructions, dual enrollment, or participating in a home school assistance program*
d. *Attend courses taught by teachers shared with a nonpublic school*
e. *Attend courses taken during the summer months when school is not in session*
f. *Attend classes or receive services for which your district is paid tuition or otherwise reimbursed*
g. *Receive technology services or textbook services rather than enrolled in classes*

Nonpublic students must actually enroll in the public school for courses to be counted, and all services must be on the public school district premises to be counted for certified enrollment shared-time. Certain district-offered services provided in the district's building are eligible to be included as if they were classes, but the FTE of class periods divided by total class periods available in a school year is limited to 0.04 for guidance/counselors and 0.01 for health/school nurses.

The following services may be offered on nonpublic school premises, but the students are not included on the certified enrollment as share time:

a. *Special education health services*
b. *Title I/ remedial education programs*
c. *Special education diagnostic services for speech, hearing, and psychological purposes*
d. *Assistance with physical and communication needs of special education students with physical disabilities*
e. *Services of a special education interpreter*
f. *Other special education services provided at the discretion of the school district with the permission of the nonpublic school*

Count nonresident nonpublic students that are enrolled in special education classes provided within your district school buildings rather than on the nonpublic school premises. Your district will not bill the resident district for the 1.0 money portion of the special education tuition. Do not include nonpublic students in classes or for whom services are provided at the nonpublic school location rather than in the public school. Special education students served at nonpublic school sites are included in the special education count by their resident districts but not certified enrollment.
