Articulation in the State of Iowa

❖   ❖

A Brief History of Articulation in Iowa

Iowa has long been a national leader in articulation and transfer credit policy development. This has occurred through cooperative effort, communication, and mutual trust among faculty and staff in Iowa's community colleges and Regent Universities. From the early development of the community college system in the mid/late1960s to the present, voluntary articulation has provided a successful vehicle for the smooth transfer of students from one Iowa public institution to another.

The Liaison Advisory Committee on Transfer Students (LACTS), formed in 1972, has been instrumental in fostering good relationships and forging the seven statewide agreements that serve as the foundation for the transfer of credit. These agreements are as follows:

• Associate of Arts Articulation Agreement;

• Associate of Science Articulation Agreement;

• Vocational-Technical Credit Agreement;

• Common Grading Symbols and Definitions Agreement;

• Credit by Examination Agreement

• Electronics/Electronics-Based Technology Agreement;

• Military Credit Agreement; and

• International Student Academic Credential Evaluation Agreement.

For more information about LACTS, and copies of these agreements, please reference the companion piece, "The Public Connection: Statewide Articulation Agreements between Iowa's Community Colleges and the Regent Universities.

Beyond Agreements: Relationships and Resources

This publication details the work that goes on at many levels across the public higher education system to ensure that the articulation agreements are working and that students have an opportunity to experience a smooth and seamless transition from Iowa's community colleges to the Regent Universities. To make this happen, information is provided and exchanged on many fronts.

You might think of the "transfer triangle" as the key to successful transition. This sets up direct communication between the student, the community college, and the Regent University. All of the information that follows will describe the many ways this exchange of information can happen.

Transfer Students at the Regent Universities

Each year, more than 4,500 students transfer from the Iowa community colleges to degree programs at the Regent Universities. Early planning by the student plays a large role in whether the transfer process goes smoothly or if problems are encountered along the way. Those students who have the most successful transfer experience know their intended major and the transfer institution they wish to enter after leaving their community college. Having this key information allows for careful planning early on in a student's academic career, and courses can be selected that will not only transfer but will also apply toward the student's intended degree.

Completing the degree in four years is more difficult for those students who have not selected a discipline, have not yet chosen their transfer institution, or are unsure if they want to continue their studies beyond the community college. However, efforts are made to provide as much information as possible throughout the transfer process to assist students in making good decisions. This document outlines the various tools that are in place at the Regent Universities to assist community college students in the transfer process.

Resources for Transfer Students

As students start their academic career at the community college, there are many resources made available to them from the Regent Universities. The following is a list of the type of information and programs available to prospective transfer students:

- Web sites (www.iastate.edu; www.uiowa.edu; www.uni.edu);

- Print publications which provide information on academic programs, admission requirements, applying for admission, transfer credit policies, financial aid, and scholarships;

- Community college visits by Regent representatives;

- Transfer fairs at community colleges hosted by community college advising staff where admissions representatives are available to answer questions from prospective students;

- Transfer open house programs on Regent campuses where students explore academic and student life opportunities;

- Individual campus visits for transfer students;

- Group visits to Regent institutions provided by the student's community college;

- Course equivalency guides developed by Regent institutions which assist students in planning their course work at the community college to ensure course transferability to a specific Regent University;

- Transfer plans and articulation agreements developed cooperatively between community colleges and Regent Universities;

- Joint admission/advising programs;

- Four-Year Graduation program for students who are "on track" when they transfer.

The Regent Universities also cooperate with each other in their outreach to prospective community college transfer students through the following means:

- The *Public Connection* brochure which was completed to outline transfer admission requirements at each of the Regent Universities and provide students with an overview of the current statewide articulation agreements;

- Joint community college visits in both the fall and spring semesters. Each year Regent representatives visit approximately 8-10 community colleges together to provide students the chance to gather information from each one of the Regent Universities at the same time. During these visits, Regent representatives also meet with the advising staff at the community college to provide updated information and discuss transfer issues.

Once students are offered admission to a Regent University they receive an evaluation of transfer credit and other pertinent information about enrolling at the Regent University of their choice. Transfer students are also invited to attend early transfer registration/orientation programs where they meet with an adviser and register for classes at the same time as their currently enrolled classmates.

Resources for Community College Advisers

If students are to be successful in the transfer process, it is important that they work with their community college adviser in defining career goals, gathering information about four-year colleges and universities, and selecting transferable courses. Community college advisers have a great deal of knowledge about transfer credit issues and policies, and the Regent representatives continue to build relationships with them to keep them well informed. This is done in a number of ways, and examples are listed below.

- Regent universities newsletters sent to community college advisers two to four times per year;

- Listserv for community college advisers where periodic updates on events, policy and program changes are given by the Regent Universities representatives;

- Periodic Telnet meetings to address current issues and to answer questions that have recently arisen in their advising sessions with prospective transfer students;

- Statewide face-to-face meetings once per semester to distribute new recruitment and advising materials, help train and orient new community college staff, and provide ongoing staff development for experienced advisers;

- Articulation conferences are held once a year and focus on a selected academic discipline. This is also a program for community college faculty and Regent faculty to discuss course content and issues in the chosen discipline;

- Joint meetings with advisers after community college visits to address questions that might be unique to that particular campus, discuss trends in that college's transfer majors and patterns, and to review important policies, deadlines, and program updates;

- Community college update programs where community college advisers are invited to campus to learn more about advising for selected university majors. They may meet with university faculty and staff to hear specific advising tips and program facts, tour campus facilities, and may receive comprehensive advising materials to take back to their campus to share with their colleagues;

- Advisory Boards to work with the University's Office of Admissions to revise and improve transfer publications, discuss new consortiums, and strategize new methods of increasing the academic and social transition of transfer students.

It should also be noted that it is important for students to work with advisers or representatives at their transfer institution to ensure that students are maximizing their course selection at the community college.

Articulation Agreements at the Regent Universities

Articulation agreements have been developed between community colleges and Regent Universities to assist students in the transfer process. An articulation agreement can generally be defined as "a written or verbal agreement between two institutions regarding the acceptance of transfer credit from one school and how it will be used to meet degree requirements at another school." Within that definition, institutions articulate in a variety of ways, such as:

- The acceptance of a full two-year degree in meeting some or all of the general education requirements at a four-year institution. An example of this would be the statewide Associate of Arts Articulation Agreement;

- Program-to-program articulation: The acceptance of courses taken in a specific two-year degree program at a community college toward meeting course requirements for a bachelor's degree in the same or closely related program at the four-year institution. Examples include: Turf and Greenhouse Management Diploma/AA option to Horticulture (Iowa State University); RN to BSN (The University of Iowa); Health Care Administration Applied Science degree to Gerontology (University of Northern Iowa);

- Course Equivalencies: The acceptance of courses taken at a community college as meeting the degree requirements at a Regent University. These equivalencies are available to students and community college advisers on the Web and in printed form;

- The articulation of a course or group of courses identified at the community college as vocational-technical being accepted in a four-year bachelor's program to meet degree requirements. Examples include Fashion Merchandising courses to Apparel Merchandising, Design and Production (Iowa State University); Radiation Technology courses to Radiation Sciences (The University of Iowa's Carver College of Medicine), and Robotics Automation Technology courses to Technology Management (University of Northern Iowa).

In addition to articulation agreements, two other forms of guidance are very helpful in the transfer process:

- Transfer Plans: Typically, a printed outline of courses that students can take at the community college that will transfer into a specific bachelor's degree program at the designated Regent University. Some of these are available on the Web for easy reference;

- Transfer Guides: Transfer advisers or other University faculty/staff at Regent institutions assist students in drawing up an individual transfer "plan." In other words, they will work individually with a student to help him/her choose classes at the community college that will transfer and help the student have a smooth transition to the four-year program.

Associate of Arts Articulation Agreement

The "Associate of Arts Articulation Agreement" exists between the three Regent Universities and 15 Iowa community college districts for students transferring with an associate of arts (A.A.) degree from an Iowa community college to Iowa State University, The University of Iowa, or the University of Northern Iowa. Students transferring with an A.A. degree to a Regent University who have fulfilled the requirements outlined in the agreement will have met all freshman- and sophomore-level general education requirements. They will be enrolled at junior level status in any major within the participating colleges at the Regent Universities as listed below:

- Iowa State University—College of Liberal Arts & Sciences, College of Business

- The University of Iowa—College of Liberal Arts & Sciences, Henry B. Tippie College of Business, and the College of Education

- The University of Northern Iowa—All undergraduate programs (common general education program across the university)

For a complete list of the majors participating in the Associate of Arts Articulation Agreement at each Regent University, see Appendix A.

Individual Community College/Regent University Agreements

In addition to all of the programs that accept the A.A. degree as a package to satisfy general education core, there is an ever-growing (and constantly changing) number of individual institutional articulation programs to help students satisfy specific major requirements at each university. Some are full program agreements, some are block core agreements or individual course transfer plans, while others still are additional institutional partnerships designed to facilitate effective transfer. Students are encouraged to contact the Office of Admissions for specific and updated information on each program.

For a complete summary of the more comprehensive individual agreements between each community college and each Regent University, see Appendix B.

Summary

The cooperative environment in which Iowa community colleges and Regent institutions work provides the foundation for voluntary articulation across the state. Without this cooperation and shared purpose, smooth articulation would not exist. Not only do the advisers and admissions personnel work closely together, there are also several statewide groups who provide direction and expertise.

The Liaison Advisory Committee on Transfer Students (LACTS), formed in 1972, is composed of six members: three representatives each from the community colleges and Regent institutions. LACTS serves as an advisory board to facilitate and review articulation. It was the driving force in the development and implementation of the original statewide agreements, and remains active today in the annual review process and discussion of transfer processes.

The parent groups of LACTS are the Iowa Community College Presidents, and the Regents Committee on Educational Relations (RCER), which is composed of 12 Regent representatives, one community college president, one Department of Education representative, and two Board of Regent representatives. RCER works to establish closer relations with post-high school institutions and to facilitate articulation by developing procedures for validation and acceptance of credit, and by recommending modifications to the general policy concerning admission of undergraduate students.

The Association of Iowa Community College Arts and Science Administrators (AICCASA) meets several times each semester. Also attending these meetings are the Assistant Directors for Transfer Relations at the Regent institutions. These meetings provide a forum for discussion about current articulation issues which may lead to committee review and additional statewide agreements, or modifications to existing agreements.

The Annual Articulation Conference is also a product of this group. The purpose of this conference is to provide an opportunity for Iowa community college and Regent faculty to discuss and review curricula, teaching methodologies, intended course outcomes, and assessment techniques. These content experts appreciate this opportunity to network, and to strengthen relationships between two- and four-year counterparts. Recent conference disciplines include: computer science, diversity requirements, math, history, elementary education, chemistry, art, biology, and foreign languages.

With the many resources available to both students and staff, it is evident that voluntary articulation in the state of Iowa not only exists, but is flourishing. Students who take advantage of the staff resources and the expertise they provide, as well as the full gamut of printed information and campus visit opportunities, will find the transfer from Iowa community college to Regent University seamless.

DEFINITIONS

AA Agreement applies (A): The acceptance of the Associate in Arts degree in meeting some or all of the general education requirements at the Regent University.

Program to Program Articulation Agreement (P): The acceptance of courses taken in a specific two-year degree program at a community college toward meeting course requirements for a bachelor's degree in the same or closely related program at the Regent University.

Transfer Plan (T): A printed outline of courses that students can take at the community college that will transfer into a specific bachelor's degree program at the designated Regent University.

Program no longer offered but the articulation agreement is still valid for students transferring with this degree program completed.

DEFINITIONS

AA Agreement applies (A): The acceptance of the Associate in Arts degree in meeting some or all of the general education requirements at the Regent University.

Program to Program Articulation Agreement (P): The acceptance of courses taken in a specific two-year degree program at a community college toward meeting course requirements for a bachelor's degree in the same or closely related program at the Regent University.

Transfer Plan (T): A printed outline of courses that students can take at the community college that will transfer into a specific bachelor's degree program at the designated Regent University.

AA Agreement applies (A): The acceptance of the Associate in Arts degree in meeting some or all of the general education requirements at the Regent University.

Program to Program Articulation Agreement (P): The acceptance of courses taken in a specific two-year degree program at a community college toward meeting course requirements for a bachelor's degree in the same or closely related program at the Regent University.

Transfer Plan (T): A printed outline of courses that students can take at the community college that will transfer into a specific bachelor's degree program at the designated Regent University.

Kirkwood offers Associate of Arts Degrees in the following programs. It is understood that each of these degrees—as AAs—would be honored as such upon transfer to each of the Regent Universities:

- Communications Media/Public Relations
- Early Childhood Education
- Education Careers
- Legal Assistant/Paralegal
- Human Services

- Disability Services Careers
- Law Enforcement
- Corrections
- Sign Language Interpreting Training
- Management Development

DEFINITIONS

AA Agreement applies (A): The acceptance of the Associate in Arts degree in meeting some or all of the general education requirements at the Regent University.

Program to Program Articulation Agreement (P): The acceptance of courses taken in a specific two-year degree program at a community college toward meeting course requirements for a bachelor's degree in the same or closely related program at the Regent University.

Transfer Plan (T): A printed outline of courses that students can take at the community college that will transfer into a specific bachelor's degree program at the designated Regent University.
