

Iowa State Board of Education

Executive Summary

March 31, 2016

- Agenda Item:** Iowa Community Colleges Joint Enrollment Report 2015
- Iowa Goal:** Individuals will pursue postsecondary education in order to drive economic success.
- State Board Role/ Authority:** The Iowa Community Colleges Joint Enrollment Report 2015 provides information for all community colleges and the general public. This report is presented for information only as the State Board provides leadership and advocacy for the system of education in Iowa.
- Presenter:** Jeremy Varner, Administrator
Division of Community Colleges
- Eric St Clair, Educational Program Consultant
Bureau of Career and Technical Education
- Attachments:** 1
- Recommendation:** It is recommended that the State Board hear and discuss this information.
- Background:** The Iowa Community Colleges Joint Enrollment Report 2015 provides information on community college students who are jointly enrolled in high school. Joint enrollment of high school students accounts for more than 30 percent of total community college credit enrollment and almost 20 percent of total credit hours. In Iowa, high school students enroll in community college credit courses through a variety of ways including Postsecondary Enrollment Options (PSEO) courses, college courses offered through a contract between a local school district and a community college, and enrollment in college credit courses independently as tuition-paying students.
- The number of jointly enrolled students rose to a record high of 44,034 students in fiscal year 2015. Year-to-year growth was 2.4 percent. The average annual rate of growth over the last five years was 2.5 percent. Except where noted, data included in this report are taken from the Community College Management Information System (MIS).

It is the policy of the Iowa Department of Education not to discriminate on the basis of race, creed, color, sexual orientation, gender identity, national origin, sex, disability, religion, age, political party affiliation, or actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code sections 216.9 and 256.10(2), Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688), Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.). If you have questions or complaints related to compliance with this policy by the Iowa Department of Education, please contact the legal counsel for the Iowa Department of Education, Grimes State Office Building, 400 E. 14th Street, Des Moines, IA 50319-0146, telephone number: 515-281-5295, or the Director of the Office for Civil Rights, U.S. Department of Education, Citigroup Center, 500 W. Madison Street, Suite 1475, Chicago, IL 60661-4544, telephone number: 312-730-1560, FAX number: 312-730-1576, TDD number: 877-521-2172, email: OCR.Chicago@ed.gov.

Executive Summary

The Iowa Department of Education collects information on joint enrollment from Iowa's 15 community colleges. Jointly enrolled students are high school students enrolled in community college credit coursework. Most jointly enrolled students enroll through Senior Year Plus programs such as Postsecondary Enrollment Options (PSEO) and concurrent enrollment. Other students enroll independently as tuition-paying students, or enroll in courses delivered through contractual agreements that do not meet the definition of concurrent enrollment. For more information about Senior Year Plus programs, please refer to the department's [website](#).

This report consists of fiscal year (FY) and trend data on joint enrollment, including headcount enrollment, credit hours taken, student demographics, and enrollment by program type and offering arrangement. All data included in this report are taken from the Community College Management Information System (MIS) and confirmed by each college, unless otherwise noted.

Some of the highlights of this FY 2015 report include:

- Iowa ranks first among the 50 states in providing college-level coursework to high school students. Enrollment of students under the age of 18 at Iowa's community colleges far outpaces the average enrollment of similar students at community colleges and four-year public institutions nationwide.
- Enrollment increased from 42,996 students last year to 44,034 this year, a 2.4 percent increase. Nine community colleges experienced increased enrollments; six experienced declines. However, 12 colleges experienced an increase in the number of credits taken by high school students.
- Average annual growth over the last five years has been 2.5 percent.
- High school students participating in joint enrollment programs accounted for 31.8 percent of total community college enrollment. Approximately half of the participants were high school seniors and about one-third were juniors.
- Joint enrollment programs account for 19 percent of total credit hours.
- Among high school students, 88 percent participated in joint enrollment courses delivered through a contractual agreement between a community college and school district. PSEO courses accounted for about seven percent (7%) of total joint enrollment.
- Slightly more than 50 percent of participants in joint enrollment programs were male, compared to 45.6 percent for total credit student enrollment.
- Almost 14 percent of participants in joint enrollment programs had a minority racial or ethnic background compared to 45 percent of total credit student enrollment.
- The most common subject areas in which students jointly enrolled include social science and history, English, mathematics, healthcare, and engineering and technology.

Joint Enrollment

Each year, tens of thousands of Iowa high school students enroll in community college credit coursework. The Department of Education refers to these students as “jointly enrolled.”

In Iowa, high school students enroll in community college credit courses in a variety of ways including, through Postsecondary Enrollment Option (PSEO) courses, college courses offered through a contract between a local school district and a community college, and enrollment in a college course independently as a tuition-paying student. While sometimes referred to as “dual credit,” joint enrollment does not necessarily entail credit being issued at both the secondary and postsecondary levels. Some programs, such as PSEO and concurrent enrollment, require that credit be issued at each level, while other joint enrollment opportunities have no such requirement.

Most joint enrollment opportunities fall under the purview of Senior Year Plus. This legislation, passed in 2008, consolidated and standardized several existing programs involving college credit opportunities for high school students including PSEO, concurrent enrollment (which entails supplementary weighting for local school

- Joint enrollment grew to a record high of 44,034.
- Year-to-year growth was 2.4 percent.
- Participants in joint enrollment programs accounted for 31.8 percent of total enrollment.
- Joint enrollment accounted for 18.6 percent of total credit hours.
- Slightly more males were jointly enrolled than females.

districts), career and regional academies, Advanced Placement®, and Project Lead the Way®.

Iowa ranks first among the 50 states in providing high school students access to college-credit coursework. Data on the number of students under the age of 18 enrolled in a postsecondary institution (proxy for jointly enrolled students) clearly indicates that Iowa’s community colleges enroll students of typical high school age at a significantly higher rate than community colleges and four-year postsecondary institutions nationally (Figure 1).

Total	300,078	303,656	310,415	336,921	350,996	4.2

Joint enrollment in Iowa community colleges has risen to a record high of 44,034 unduplicated students in fiscal year (FY) 2015. In this year, jointly enrolled students accounted for 31.8 percent of total enrollment, which represents a 2.4 percent increase from the previous year. Headcount enrollment increased at nine community colleges and declined at six (Table 1, page 7), while the number of credits taken by high school students increased at 12 colleges and statewide by 4.2 percent (Table 2, page 7).

Because high school students generally enroll part-time at community colleges, they account for a higher percentage of enrollment at each college (Figure 2) than credit hours (Figure 3, page 9). Statewide, in FY 2015, joint enrollment (31.8 percent) accounted for 18.6 percent of total credit hours (Table 3, page 9). Also, the

rate at which high school students enroll in college coursework varies by local school districts and community college regions (see map insert).

The number of credit hours taken by each jointly enrolled student slightly increased, with each student enrolling in an average of eight (8) credit hours (Figure 4, page 10). Interestingly, the number of credit hours taken per student has only increased 0.6 credit hour since FY 2008.

Joint Enrollment Offering Arrangements

Contracted courses had the largest enrollment of the three types of joint enrollment arrangements, accounting for 88 percent of jointly enrolled students in FY 2015 (Figure 5, page 11). Enrollment in contracted courses rose 3.9 percent from the previous year to 41,248 students. PSEO, which accounts for 7.2 percent of joint enrollment,

Figure 4. Credit Hours Per Student by College: 2015

increased 1.1 percent from FY 2014 to a total of 3,371 students. Enrollment of tuition-paying students increased 9.8 percent from the previous year (Table 4, page 11).

Joint Enrollment Student Demographics

In FY 2015, the typical jointly enrolled student was male, Caucasian, and a high school senior. Approximately 50.6 percent of joint enrollees were male compared with 45 percent of the overall student body (Figure 6, page 12), and 13.9 percent of joint enrollees reported having a minority racial or ethnic background. Within those reporting minority status, Hispanics were the largest group at 45.8 percent, followed by Asian and Black with 18.7 percent and 17.6 percent, respectively (Figure 7, page 12). In comparison, in that same year, 18.6 percent of all community college students reported having a minority racial or ethnic background, with 33.4 percent Hispanic and 36.5 percent Black.

As expected, jointly enrolled students are younger than the overall community college student body. In FY 2015, 14.4 percent of jointly enrolled students were 15 years old or younger, 23.4 percent were 16, 40.1 percent were 17, and 22.1 percent were 18 or older.

Also, not surprising, jointly enrolled students are almost exclusively residents of Iowa. In FY 2015, 99.5 percent of these students were Iowa residents.

Grade Level of Joint Enrollment Students

Data on grade level are derived through a match between the state's K-12 data repository and the Community College Management Information System (MIS). Figure 8 on page 12 displays the distribution of high school students enrolled in Iowa community colleges during FY 2015. Jointly enrolled students tend to be high school juniors and seniors, with 80 percent being in their last two years of high school. Approximately 13 percent of jointly enrolled students were high school sophomores and seven percent were freshmen.

Figure 6. Jointly Enrolled Student Gender by College: 2015

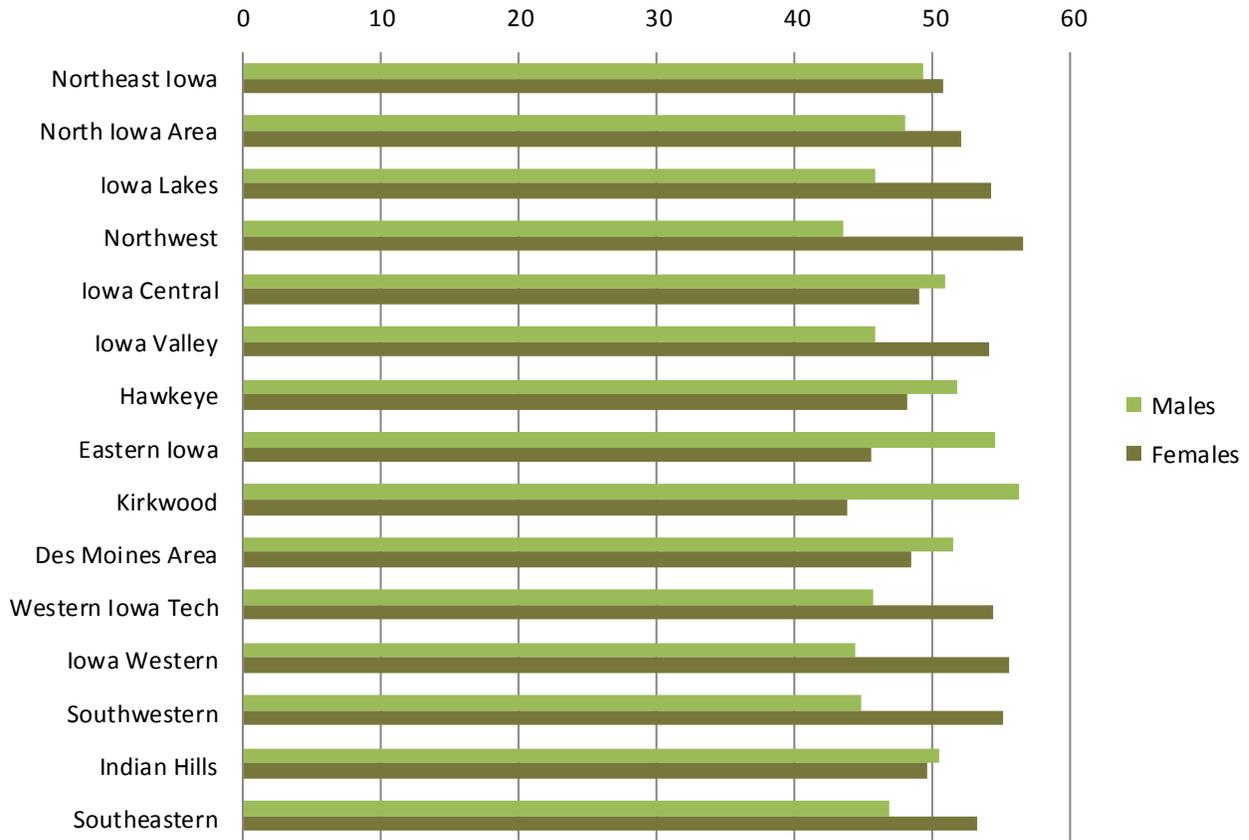

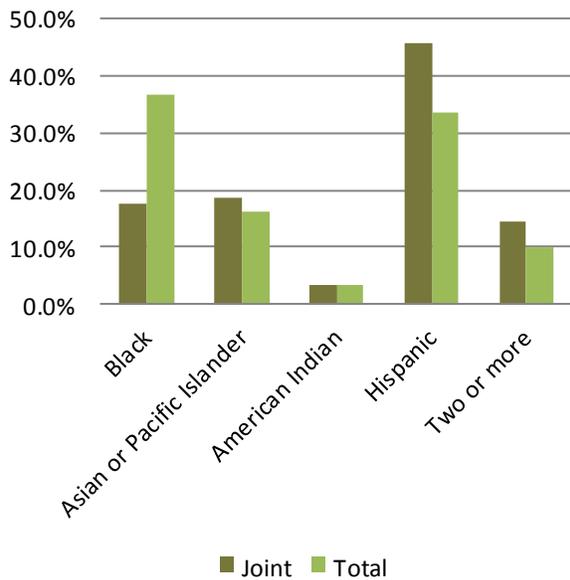

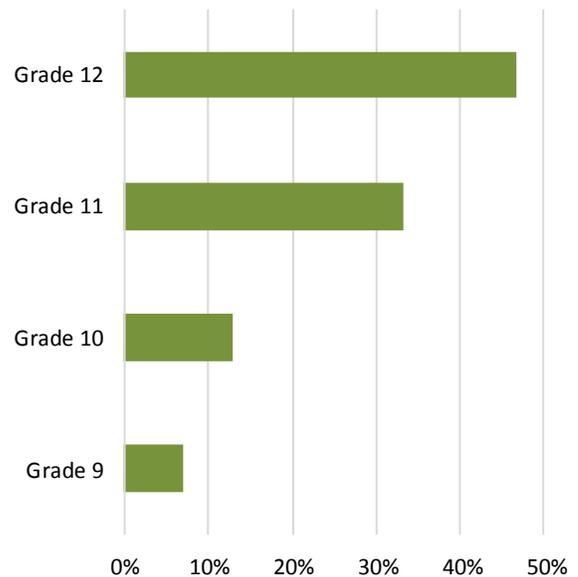

Figure 7. Jointly Enrolled Student Racial and Ethnic Background: 2015

NOTE: Those not reporting racial/ethnic background are excluded.

Figure 8. Joint Enrollment Participation by High School Class: 2015

In total, 27.5 percent of public school students in grades 9 through 12 enrolled in community college credit courses, including more than half of all high school seniors.

Concurrent Enrollment and PSEO by Subject Area

Unlike other sections of this report that utilize Community College MIS data, this section is based on Student Reporting in Iowa data submitted by Iowa public school districts. The department analyzed data on the instances of concurrent enrollment and PSEO courses taken by subject area (Table 5). Courses taken by tuition-paying students enrolling independent of the district were not included.

Of instances of PSEO courses taken, 41.1 percent were in the subject area of social sciences and history. English language and literature courses accounted for an additional 17.9 percent of courses taken. Of concurrent enrollment courses taken, the subject area with the greatest instances of courses taken was English language and literature (21.6 percent), followed by social sciences and history (14.6 percent), and mathematics (8.6 percent).

Table 6 on page 14 presents the instances of community college career and technical education (CTE) and arts and sciences courses taken by Iowa high school students through contractual agreements in FY 2015. Of courses

Table 5. Concurrent Enrollment and PSEO Courses Taken by Subject Area: 2015

taken in FY 2015, 37.0 percent were classified as CTE and 63.0 percent arts and science.

Revenue from Concurrent Enrollment and PSEO

Concurrent enrollment offerings are one of several sharing opportunities incentivized by state policy. School districts may be eligible for additional funding in the form of extra weighting in the school foundation funding formula for students participating in certain programs, including concurrent enrollment. In this case, the supplementary weighting provides districts with funding to pay community colleges for delivery of concurrent enrollment courses.

In FY 2015, community colleges generated more than \$22 million in revenue from concurrent enrollment

courses. In total, 361 high schools (duplicated) enrolled 41,248 students (unduplicated) in concurrent enrollment courses (Table 7, page 15).

Students also have the opportunity to enroll in college courses through PSEO, provided the school district does not offer a comparable course (including concurrent enrollment offerings). The school district pays the eligible postsecondary institution the cost of the course or \$250, whichever is lower.

In FY 2015, community colleges generated just over \$2.1 million in revenue from PSEO enrollment. Over the past year, 248 high schools (duplicated) sent 3,371 students (unduplicated) to a community college for postsecondary coursework through PSEO (Table 8, page 15).
