Creating Comfortable Cafeterias to Improve Child Nutrition

Comfortable Cafeterias

How Pleasant and Positive Mealtimes at School Can Set the Stage for Better Learning, Better Behavior, and Improved Health

Creating Comfortable Cafeterias to Improve Child Nutrition
Creating Comfortable Cafeterias to Improve Child Nutrition

New Standards =

More Food and More Choices

It’s Only Nutrition
WHEN they eat or drink it!

More FUEL into Kids
Less Food into the Trash Can!

Today’s Webinar
- Describe the behavioral and academic benefits of positive, pleasant mealtimes.
- Discuss the important role of school cafeterias in helping children develop positive eating habits for a lifetime.
- Share tips and resources to make school mealtimes more pleasant for both students and staff.

POLL #1
So, why should YOU care?

Better Learning

Better Behavior

Improved Health
So, what is the best schedule for her?

Creating Comfortable Cafeterias to Improve Child Nutrition

What is the best schedule for them?

Creating Comfortable Cafeterias to Improve Child Nutrition

OPTIMAL SCHEDULE FOR STUDENTS

• Walk to school
• BREAKFAST (10-15 minutes)
• Classroom learning
• Recess before lunch (RBL)
• LUNCH (15-20 minutes)
• Classroom learning
• Recess
• After-school snack

Comfortable Cafeterias

How Pleasant and Positive Mealtimes at School Can Set the Stage for Better Learning, Better Behavior, and Improved Health

Who should care about mealtimes in school cafeterias?

• School Food Service Staff
• School Administrators
• Teachers
• Nurses
• Aides
• Students
• Parents
• Coaches
• Communities

Creating Comfortable Cafeterias to Improve Child Nutrition

The Problem

Here’s what more than 1,000 K-8 public school teachers have to say about childhood hunger in our schools:

3 in 5 K-8 public school teachers say students regularly come to school hungry.

The Impact

Three prevalent consequences of hunger in schools:

Inability to concentrate

Poor academic performance

Headaches & stomach aches

80% of students who are hungry at least once a week score below the national average in reading and math.

FOOD INSECURITY

Creating Comfortable Cafeterias to Improve Child Nutrition

Creating Comfortable Cafeterias to Improve Child Nutrition
So, what does this look like?

Every school has the opportunity to create and support a Pleasant and Positive Mealtime Environment.

Pleasant & Positive Mealtime Environment

- One of best parts of the school day – break from classroom pressures
- Good food in a safe, welcoming atmosphere - showing that schools value the importance of nutrition
- Calm, comfortable tone that allows socialization and conversations
- Unrushed feeling so adults and children have time to enjoy meal

Sometimes cafeterias are not so inviting

- Students are pressured to eat certain foods or specific amounts.
- Supervising adults are not trained to support healthy eating.
- Students are not allowed to talk or socialize during meals.
- Meals are consumed in a hurry to get outside or back to classroom.

Pleasant & Positive Mealtime Environment

- A time for students to relax, socialize, and nourish their bodies and minds
- A time to fill critical nutrient gaps and refuel for concentration and focus in the classroom
- A learning laboratory for healthy eating habits and acceptable mealtime behaviors

Pleasant & Positive Mealtime Environment

- A calm, comfortable cafeteria does not happen by accident.
- Like any other important aspect of an successful school, it requires effective teamwork and communication among administrators, teachers, aides, food service, school nurses, students, and parents.

**POLL #2**

**Best Practices for Comfortable Cafeterias**

- **Recess Before Lunch**
  - Improved cafeteria atmosphere
    - Students are more relaxed and focused on eating rather than the playground
  - Less supervision in the cafeteria
    - Students have improved behavior
  - Fewer classroom discipline issues
    - Students are calmer when they return to the classroom

- **Adequate time to eat lunch**

- **Established Mealtime Philosophy**

- **Adults eating with children**

- **Increase in classroom time on-task**
  - Students return to the classroom ready to learn

- **Increased milk, vegetable, and entree consumption**
  - Less plate waste, less trash
  - Results in increased nutrients and fluid intake

- **Decreased number of nurse visits for tummy aches after recess**
Creating Comfortable Cafeterias to Improve Child Nutrition

Adequate Time to Eat Lunch

At least 15-20 minutes of seat time

Established Mealtime Philosophy

• Basis for training all staff who are in the cafeteria
• Simple, direct, easy to follow, consistent messages for children
• Helps children learn life-long skills for a healthy life

Why are mealtimes so important?

1. Today’s food experiences shape children’s life-long relationships with food.
   - The goal is to develop competent, confident, and healthy eaters.

2. Meals consumed at school are essential to healthy students with strong bodies
   and sharp brains.

3. The school cafeteria is an environment in which to develop self-discipline.

Administrators

Adults Eating with Children

Why are mealtimes so important?

1. Today’s food experiences shape children’s life-long relationships with food.

Ellyn Satter Approach

• Kids eat better when they are not pressured.
• Kids eat unpredictably, waste food, and are leery of trying new foods.
• Kids naturally stop eating and drinking when they are full.

Based on the Ellyn Satter Approach

Pleasant & Positive Mealtime Materials

Seat Time

Of at least 15-20 minutes
Division of Responsibility in Feeding

• Adults decide the *what, when, and where* of feeding at school.
• Children decide *whether they will choose to eat the foods offered* and *how much to eat*.

How do kids eat?

• Differently than adults: Cautious about new food and about new people cooking it, esp. in preschool and early elementary
• Learn by repeated exposure and experience with new food (at least 7-10 times)
• Like to be in control of their eating, with supportive adults present, in a pleasant setting, with enough time to eat

How do kids eat?

• They eat with their eyes first and are not interested in food that is unappealing to them.
• They need limits and guidance on how to respectfully decline food.
• They like to eat and socialize with friends.

How do kids eat?

• They like choices.
• They want to feel safe with food on their tray, not scared that they will be forced to eat it, pressured to try a bite, etc.
• They listen and respond to their own hunger and satiety cues.
• They need to have plenty of time to eat, at least 15 to 20 minutes of seat time.

What’s the role of School Nutrition Staff?

• Provide eye-appealing, tasty, colorful, fresh meals in a pleasant environment
  – Decide *what* foods served and how to introduce new foods successfully
  – Decide *when* (timing of meals)
  – Decide *where* (location of meals)
• Help customers feel safe, welcomed, and valued! Model/teach respectful manners.

What’s the role of all adults in cafeteria?

• Help customers feel safe, welcomed, and valued! Model/teach respectful manners.
• Let them decide *how much to eat* and *how to make choices* respectfully.
• Teach/model social skills for meals: inside voices, eating etiquette, use of utensils, and gauging time to eat before dismissal.
### Phrases that HELP in School Cafeterias

#### Phrases that HINDER
- Finish your milk.
- You didn’t eat enough of your lunch.

#### Phrases that HELP
- Are you still thirsty?
- Are you finished with your milk?
- Did you get enough to eat today?
- Are you finished with your lunch?

### Things NOT to do in School Cafeterias

- Force children to eat a minimum amount of food or milk
- Force bribe, or pressure children to try a new food item
- Take it personally if students decline or dislike what was prepared
- Over-ride their bodies’ hunger/fullness cues
