Note that lines 15.9 and 15.10 – Cash Reserve Levies is nowhere referenced in the calculation of the unspent balance for any given year. This cash reserve is only to generate funds to back the authority the district may already have but has not funded. It is also cash to fund the summer months, when funding sources aren't being received. A district might also raise additional cash for summer float to avoid paying additional

interest costs. At no time does this cash reserve levy come with any spending authority attached.

Be careful when tracking the district's financial position, to track according to the funding sources (Aid & Levy Worksheet) and NOT the revenues received by the district throughout the year. The only part of the calculation that is totally relatable to revenues received is the miscellaneous income number. Miscellaneous income is every source except: 3111, 3112, 3113, 3117, 3204, 3214, 3216, 3373, 3376, 3803, 4034, 4036, 4039, 1110-1119, 1130-1139, and 1170-1179 (Reference CAR - COA Upload, View Reports, Miscellaneous Income Report).
