Indicators

Group Work:
Group discussion on APR Data, Indicator C3. Groups discussed what data was available, is the data valid, and the reliability of the data. Groups also discussed the “data story”. What patterns and trends do you see, how could you disaggregate the data, what are the possible outliers, what are the possible explanations for the data, what additional data do we need?

The group discussed next steps going through the PIER process. The Council was encouraged to help the State prioritize their EI system using data.
